

## Design

All Securemax® Extension Brackets are designed to retrofit directly onto all Securemax® fences with all Securemax® "H" Posts pre-punched to accommodate the various toppings. ASF recommend all security fences be fitted with a security topping to further prevent scalability and an intruders ability to use the top of the fence as a pull point.

## Performance and Durability

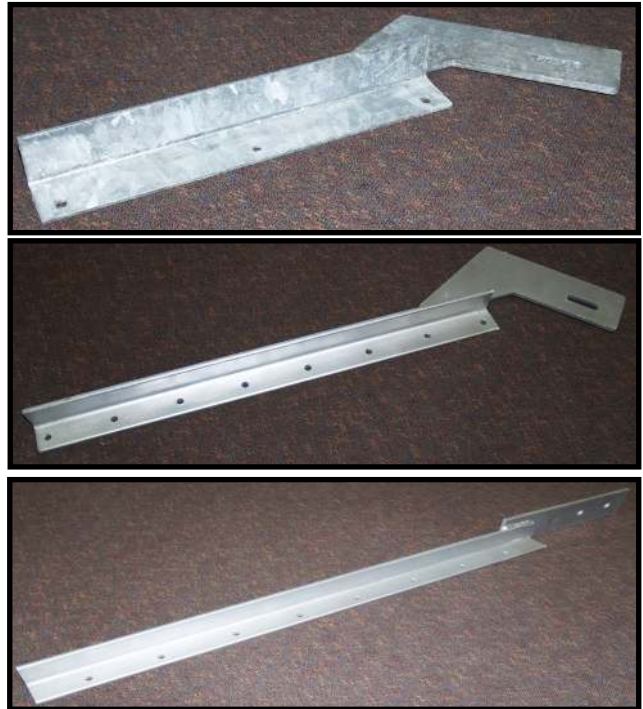

Securemax® Barb Extensions/ Fence Toppings are Hot Dipped Galvanised for maximum functionality and longevity.

## Applications

- Correctional Facilities
- Detention Facilities
- Water Treatment Plants
- Roads and Bridges
- Power and Sub Stations
- Industrial Applications
- Private Industries
- Shipping Ports
- Gas Lines
- Railway Infrastructure
- Airports and more

## Finishes

Hot Dipped Galvanised  
 Also available in powder coated finishes

## Unique Features

Securemax® extension brackets can be fabricated to support all types of toppings incl:

- Barb Wire
- Security electric fencing
- Razar tape (flat loop and concertina)
- Additional mesh

## Recommended Fixings

All extension brackets are designed to be fitted with 2 x M12 cup head bolts and security shear nuts, making them virtually impossible to be removed once installed.
